

'Gulf Coast' Blueberry

Plants are between 5"- 6" tall. They grow fast!!
This specific specimen boasts very low chill requirements which enable it to be grown and produce fruit virtually anywhere. Great quality, one of the better low chill commercial varieties.

HIGHLIGHTS

- Early season
- 100-200 chill hours
- Medium sized fruit
- Compact, full habit
- Excellent for containers

This Blueberry has so many excellent qualities that it's almost a new kind of plant -- the ultimate edible ornamental! It has a dense, rounded, semi – dooryard form only 5 to 6 feet high and wide, making it a great choice for containers. The glossy silvery-green leaves are semi-evergreen, so you can plant it anywhere for year-round color! In spring, masses of pink flowers (instead of the white typical of Blueberries!) grace the lovely branches, followed by berries ... LOTS of berries!

Each plant bears the most delicious, dime-sized, dark blue berries you will ever taste! The flavor is sweet and juicy, totally unlike the berries you buy long after harvest at the grocery store. Wait until you discover the joy of fresh blueberries, straight from the patio!

A low chill high bush variety. Excellent flavour, firmness and good picking scar. A vigorous upright bush with moderate toughness and good tolerance to root rot.

Zone	8-10
Bloom StartToEnd	Spring-summer
Habit	Dooryard
Plant Height	5 ft - 6 ft
Plant Width	5 ft - 6 ft
Bloom Color	Pink
Light Requirements	Part Sun
Soil Tolerance	Acidic, loamy
Soil PH	5.5—6.5
Uses	Containers
