

Berries

Blackberries

Low Chill and Thornless, all the sweetness and none of the bleeding, that's what you get with our select Blackberry cultivars.

Blueberries

Low chill southern highbush blueberries for central Florida and the coasts. We try to have the same varieties as the local U-Pick farms have. Blueberries require very acidic soil in order to thrive and produce well. For a truly beautiful display mix blueberries, roses, and azaleas together to create dazzling and tasty spot in your yard.

Elderberries

Looking for an easy to grow and extremely healthy berry, then Elderberry is your fruit. The tasty berries can be used in pies, tarts, wine, and syrups. Elderberries are known for their immunity boosting properties, so when you have an overabundance dry the berries and create tinctures that can be taken every day. Just remember that it is advised to cook the berries before eating.

Mulberries

Mulberry trees (*Morus* spp.) enjoyed popularity in years past as ornamental shade trees as well as for their copious edible fruit, which can be eaten raw or made into luscious preserves, pies and wine. Be it an Everbearing (dwarf or standard size, or the Pakastani with its big leaves and up to 9 inch long berries, you can't go wrong with these easy to grow plants. The dwarf Everbearing can also be grown in a container on your patio making it easy to pick some for breakfast.
